

Unit Front Door Handle

As of 9/1/2011, all new owners of a unit at Murieta must make sure that their front door handle is in compliance with the CC&Rs and have 30 days to change it if it is not the same style as that of the handle originally installed by the builder.

Guidelines to follow when the need arises to change your front door handle:

- Perhaps the simplest and most cost effective solution is to have your deadbolt "re-keyed." Remove the deadbolt and take it to a locksmith (or have one come to you). The process takes a few minutes. You will then have a deadbolt with the "guts" changed and two new keys, but the original door handle equipment remains.
- If you prefer to get a new door handle, it must look as similar to the original handles as possible. Regrettably the exact match is no longer available.
- **The handle must be a "thumb latch grip handle set".**
- **The color of the handle set must be "Antique Brass"**

These are examples of acceptable handles:
